INTEGRATED POLICY

OFFICINA BOCEDI is involved in:

design, manufacture, sale and assistance for packaging systems.

The General Management, aware of the strategic importance of the metalworking sector for sustainable development, is committed to complying with current environmental regulations and adopting sustainable practices at every stage of its operations. These practices are integrated in a complementary way with the Company's ability to produce high-quality machinery that reflects the traditions, roots, and manufacturing passion of the people working at Bocedi, through the implementation of a management system in accordance with ISO 9001 and ISO 14001 standards.

Recognizing its responsibilities towards the environment, customers, and all identified stakeholders, the company has defined the following Integrated Policy, which represents its commitment to sustainability, the reduction of environmental impacts and the continuous improvement of its performance, while preserving all the processes that have always characterized the quality of its operations, in particular:

- Identify and accurately interpret the needs and expectations of both existing and potential customers;
- Develop and deliver services and systems with a Quality standard that ensures customer satisfaction, pursuing continuous improvement and maintaining an efficient quality management system;
- Analyze risks and opportunities, and establish strategic quality objectives that take environmental aspects into account, monitoring them periodically;
- Promote collaboration among all parties and raise awareness of the importance of an integrated management system.

Furthermore, Officina Bocedi, by operating in a more sustainable manner and being mindful of its impacts, the Company aims to:

- Comply with all applicable national and international environmental regulations, also taking into account industry guidelines regarding waste management, the responsible use of natural resources, and pollution prevention;
- Minimize the environmental impacts resulting from its activities. To this end, the company adopts design, technological, and operational solutions aimed at optimizing the efficiency of production processes and limiting the consumption of natural resources;
- Actively commit to reducing energy consumption by adopting measures that optimize efficiency and minimize waste;
- Adopt a waste minimization approach;
- Encourage a corporate culture of reuse and recycling within the organization;
- Prioritize collaboration with suppliers who share the company's commitment to sustainability and who can guarantee products and services compliant with the main applicable environmental regulations;
- Adopt preventive measures to reduce environmental, asset, and occupational risks, with the aim of ensuring a safe working environment for employees and limiting negative impacts on the surrounding area.

The General Management is constantly committed to implementing policies that promote sustainability, responsibility, and environmental protection, continuously improving its practices and adequately responding to the requirements of regulations and stakeholders. A proactive approach to environmental management, waste reduction, and increased recycling form the foundation of our strategy for a greener and more sustainable future.

The dissemination of the Integrated Policy, as well as its objectives, takes place through the distribution of this document and its publication on the company's communication channels.

General Management commits to periodically reviewing the organization's Integrated Policy to ensure its ongoing suitability and applicability.
